

Waves Envirotech is a multi disciplined consulting company specialized in providing concept design, basic & detailed engineering services, consultancy for supply chain management, project management consultancy services in the field of water & wastewater treatment, waste management, waste to energy, air pollution control, & other related process engineering. **Waves Envirotech** is committed to create values with an objective of effective environmental management. We are one of the India's fastest growing technologies driven water & wastewater treatment solution company.

Our solutions are designed to meet the treatment objective, lowering costs (reduced capex & opex), reduce risks (reduced downtime & complexities), Energy efficient & improving productivity for wide range of industries Apart from the above services we also offer other important services such as preparation of Pre Feasibility Reports, Detailed Project Reports (DPRs), water supply network & sewerage network designs using advanced softwares.

OVERVIEW

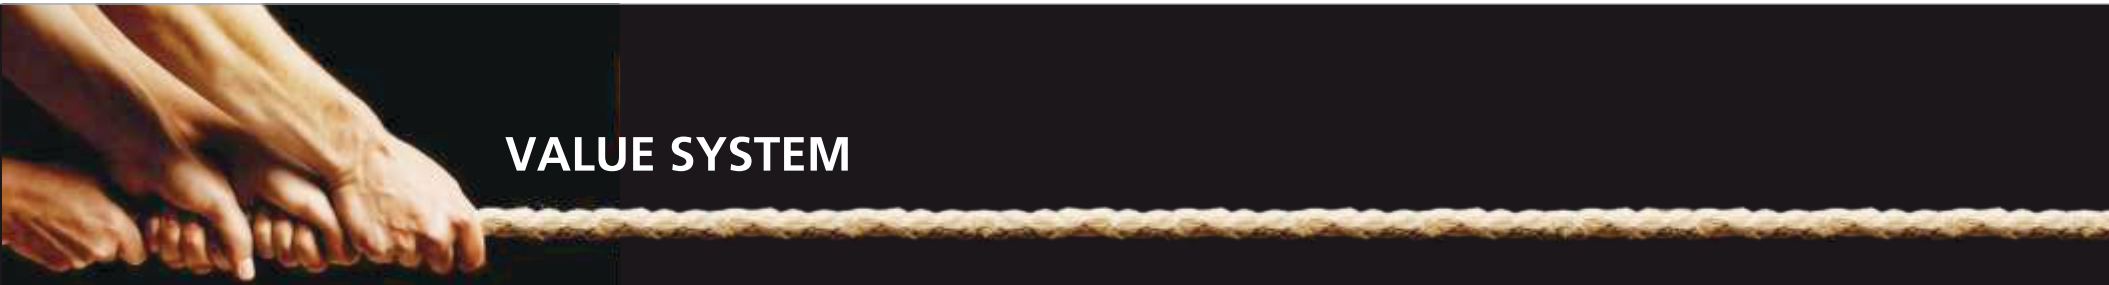

Waves Envirotech inherits the strength of a strong team of well qualified and experienced professionals in the field of Environmental, Civil, Structural, Mechanical, Chemical, Electrical & Instrumentation Engineering.

Waves Envirotech offers inhouse services for the Design, Engineering, Process Technology Know - how, Equipments Sourcing & Supply, Fabrication, Construction, Erection & Commissioning of Treatment plants. This allows the company to provide the highest Quality Systems, based on the latest available Technologies, at competitive prices for National & International Turn-key Projects.

We focus on optimizing natural resources and driving prosperity through our unrivaled Engineering Technology Solutions. With all the solutions, we design and offer both Environmental benefits and Economic Value to the end user.

The company is managed & driven by a Team of professionals with hands on Experience and Expertise in Water Treatment & Environment Industry.

We have the right Technology Solutions and expertise to tackle the toughest Environmental Solutions. We take pride in providing Innovative, Sustainable, Environment friendly Treatment Solutions that satisfy our client's needs. In anticipation of our presence in many countries and pool of strategic alliances across the world, we will meet our client's requirements globally.

VALUE SYSTEM

VISION

We strive to be our Customer's most 'Preferred Partners', in providing Sustainable Solutions, for all their Process & Environmental needs.

MISSION

Striving to be the best, in all that we do.

CORE VALUES

Client Centered - We gained respect from our client by understanding their requirement, fulfill them, through best suitable Technologies & Solutions within their budgets. Providing value added services based on current & future requirements, delivering Values, whenever & wherever needed.

Community Focused - We actively participate in initiatives towards the betterment of Communities & the Environment we operate, making it better place to live today & tomorrow.

Safety - We are committed, to consistently deliver unrivaled Technical & Operational Excellence in all our projects by maintaining highest safety & Environmental Standards.

Integrity - We are responsive, accountable, decisive, clear, and ethical in all our communications & interactions we do and we act with high Integrity, Energy & Passion.

Quality Excellence - We set High Standards for Success and work hard to surpass them. We consistently look forward, for better ways, to do things.

Sustainability - We understand the bigger picture & add value to the Bottom Line.

Team & Partners - Collective partnerships with all our vendors and creating values for a given requirement, by building relationships through mutual respect, recognition, & integrity. We work together as part of a high performing team and deliver what we promise, thru best Supply Chain practices.

QUALITY POLICY

We shall consistently exceed our Customer's Expectations & Deliver World Class Technical Solutions, within Budgets & Timelines.

WATER TREATMENT

Raw Water Treatment Systems

Water Pretreatment

Clarification

Solid Contact Clarifiers | Clariflocculators | Parallel Plate Settlers | Lamella Clarifiers | Tube Settlers | Ultra High Rate Solid Contact Clarifiers | Clari-Plate Settlers | Clari-Tube Settlers, etc.,

Filtration

Rapid Gravity Sand Filters | Pressure Filters | Auto Self-Cleaning Filters | Auto Valve Less Gravity Filters | Disc Stack Filters, etc., Media Filters - Sand Media | Multi Grade Media | Anthracite Media | Activated Carbon | Iron Removal Media | Heavy Metal Removal | Organics Removal | Oil Removal | Color Removal Filters

Disinfection

Chlorination (Gas Chlorinators | ClO₂ Generators | Hypo Dosing Systems) | MIOX | UV | Ozone Based Treatment Systems.

Lime soda softening

Realkalization | Remineralization

Arsenic & Fluoride Removal Systems

Membrane Based Treatment Systems

- Micro Filtration
- Ultra Filtration
- Nano Filtration
- Reverse Osmosis
- Brackish water | High Brackish Reverse Osmosis
- Compact Skid Mounted | Barge Mounted Desalination Units
- Sea Water Desalination with Energy Recovery Systems
- Wastewater Recycle, Reuse Projects
- Reject Recovery Systems

Resin Based Treatment Systems

- Water Softeners - Hardness Removal
- Demineralization Units - High Purity Water requirements
- Color Removal | Boron Removal | Heavy Metal Removal Units
- Oil Removal Systems - Oil Removal | Recovery
- Mixed Bed Unit - Polishing Treatment & Silica Removal
- Condensate Polishing Units
- Deionizer - High Purity Water requirements
- Electro Dialysis Units - High Purity Water requirements

WASTEWATER TREATMENT

Wastewater Treatment

(Domestic Sewage | Industrial Effluent)

- Physico - Chemical Treatment
- Biological Treatment - Aerobic & Anaerobic Processes

Aerobic Biological Treatment Processes

- Conventional Activated Sludge Process (ASP)
- Biological Aerated Filters (BAF)
- Submerged Aerobic Fixed Film Reactors (SAFF)
- Sequential Batch Reactor (SBR)
- Biological Nutrient Removal (BNR)
- Moving Bed Bio Reactor (MBBR)
- Extended Aeration Process
- Carrousel Aeration Process
- Trickling Filters (Bio Towers)
- Rotating Biological Contactors (RBC)
- Membrane Bio Reactor (MBR)
- Constructed Wetlands.

Anaerobic Biological Treatment Processes

- UASB - Up Flow Anaerobic Sludge Blanket Reactor
- Low Rate Anaerobic Digesters
- High Rate Anaerobic Digesters
- LVF - Large Volume Fermentors
- Hybrid Digesters
- CST Reactors
- Anaerobic Membrane Bio Reactors (AMBR) Systems
- Sludge digesters

SOLID WASTE MANAGEMENT & AIR POLLUTION CONTROL SYSTEMS

Solid Waste Management

Biomethanation

Incineration

Pyrolysis

Secured Land Fill

R D F

Composting

Waste (Generation Of Bio Gas)
To Energy (Utilization Of Bio Gas)

Air Pollution Control Systems

Multi Cyclone

Dust Extraction Systems

Cyclone Separator

Fumes Extraction System

Industrial Blower

Dust Collector

Bag Filter

ID Fan

Axial Fan

Industrial Scrubber

ESP - Electro Static Precipitator

OTHER TECHNOLOGIES & SERVICES

Other Technologies / Systems - Offered By Us

- Oil Removal / Recovery (API | CPI | TPI | DAF | IGF | NSF | CF).
- Jet Aeration Systems
- Chemical Handling - Bulk Storage, Handling & Dosing Facilities
- Odour Control & VOC Emission Control.
- Compact Package Type Site Fabricated STPs & ETPs
- Compact Package type Pre-Fabricated STPs & ETPs
- Zero Liquid Discharge Systems.
- High Saline RO Reject Handling.
- Mechanical Evaporation Systems - MEE | MVR.
- Produced Water Treatment
- Smoke Utilization System
- Swimming Pool Filtration System
- Pool Disinfection Systems
- Rain Water Harvesting
- Bio gas Handling | Storage
- Bio gas Purification & Utilization system

Other Services - Offered By Us

- Design & Engineering Services for various Treatment Plants
- Detailed Engineering for EPC projects
- Project Management Services
- Civil Engineering & Construction
- Engineering Consultancy Services
- Fabrication
- Automation of Treatment Plants
- Recommissioning of Treatment Plants
- Laboratory Testing Facilities
- Operation & Maintenance Contracts
- Modifications | Retro fitment of existing Treatment Plants
- Upgradation of Existing Treatment Plants
- Long Term Service Contracts

OUR PRESENCE

Strategic Alliance & Technical Collaborations

We involved ourselves as active partners in multiple Strategic Alliances & Technical Collaboration partnerships, to provide a wide range of Solutions & Technologies in the Water, Wastewater & Environment Fields, to our clients.

Our Presence

We have Experience working with various well renowned National & International Clients and Project Management Companies, all over the world. We are well accounted with their Technical requirements & Working Procedures. Our Experience & In-House Services for the Design, Engineering, Process Technology Know-How, Equipment Supply, Fabrication, Construction, Erection, Commissioning and Start-up, allows us to provide the highest Quality Systems, based on the latest available Technologies at Competitive Prices for National & International Turn-key Projects.

We do have stringent Quality Plans for major equipments, in line with Indian (IS) & Global Standards (ASME | BS | DIN), and methodologies for workmanship results, in building high Quality Plants. Our experience working in the following segments, makes us capable enough, to undertake project consultancy services for large Turn - Key projects.

Segments We Work

- Automobiles
- Breweries
- Cement
- Chemicals
- Commercial Establishments
- Dairy
- Distilleries
- Electronics & Semiconductor
- Fertilizer
- Food & Agro (FMCG)
- Municipalities
- Mines & Minerals
- Metals & Electroplating
- Oil & Gas extraction
- Petrochemicals
- PSUs
- Pharmaceuticals & Healthcare
- Power
- Pulp & Paper
- Refineries
- Residential Communities
- Steel
- Sugar
- State & Central Gov. Bodies
- Special Economic Zones
- Textiles
- Tanneries

OUR STRENGTH

Team

Waves Envirotech Private limited is managed by Board of Directors comprising professionals with wide range of experience in Water, Wastewater Treatment, Infrastructure, Construction, Supply Chain, Project Management, Finance and Environment service sectors.

The team has been structured with a balanced mix of Technical & Business Managers, who comes with hands on experience and expertise in Water and Wastewater Treatment Solutions. This set up, having deep process knowledge and extensive experience of Supply Chain & Project Management services with them, which is unique.

The Waves Envirotech team consists of an elite group of Professionals, experts and engineers chosen for their Domain expertise & contributions to the company. They play a leading role in the development of Technology, Designs, Business Processes and mentor their technical talent. These exceptional individuals have earned the esteem of their colleagues and the respect of management for their indispensable wisdom and counsel.
